Experience

TSS Consultancy Services: Through this internship program, I work as a backend developer using advanced Java and data processing. .	December 2023 - April 2024
--	-------------------------------

Projects

- **Study Material:** This website has an admin panel that allows the admin to view and update user details, as well as perform basic operations in the courses. as well as the user can easily register and login. React, Node, Express, and MongoDB were used in the entire website design(MERN). 2023-2024
- **Marketing Website:** This website was created specifically for marketing purposes. It is totally responsive and has all of its coding written in HTML, CSS, and the bootstrap framework. I also included some gif videos to create an attractive website. 2022-2023
- **Fashion Store Website:** The fashion store website is a collection of clothing items and other items for men and women. It is a particular kind of online store where you can purchase stylish items, and it has an extremely appealing website. that website is developed with the help of bootstrap, html, css, and js. 2021-2022
- **Contactbook:** This application was developed with advanced Java and is used for CRUD operations on contact numbers. 2022-2023
